

Architect/Senior AI/ML Engineer at IGNITE by FORVIA HELLA w/m/d

all-remote, global

Join the Future of Software – with IGNITE by FORVIA HELLA 🚀

We are looking for tech visionaries who want to rethink software development.

Are you ready to shape the next generation of mobility?

Do you have a passion for technology and a desire to work on groundbreaking projects?

Then IGNITE by FORVIA HELLA is the place for you!

We are an agile team that develops and distributes software solutions. Our core competence lies in the development of software products that are directly integrated into vehicle systems or that are usable in the development environment of industrial sectors. But we go even further: with the latest technologies such as machine learning and cloud computing, we take our software products to the next level, creating solutions that go beyond traditional approaches. Sounds exciting? Keep reading!

What you can look forward to

→ **Entrepreneurial Ownership:** At Ignite, you won't just execute tasks – you'll shape products, influence direction, and leave your mark. If you love taking ideas from zero to one, you'll feel right at home.

→ **Work That Energizes You:** There's no routine at Ignite. If you love tackling real engineering challenges and enjoy pushing boundaries for no-so-straightforward problems and advanced technologies, this is your playground.

→ **Cutting-Edge Technologies:** AI, machine learning, LLMs, and cloud-native approaches form the backbone of everything we build. You'll experiment, prototype, and ship solutions that meaningfully impact the future of vehicle and industrial tech.

→ **Flexibility:** Collaborate across continents and shape a schedule that supports your productivity and lifestyle., fully remote.

Architect/Senior AI/ML Engineer at IGNITE by FORVIA HELLA w/m/d

all-remote, global

What you should bring

- **A Builder Mindset:** You don't wait for instructions — you seek opportunities, propose solutions, and make things happen.
- **Curiosity and Drive:** You love technology not as a spectator but as a creator. You push yourself, learn fast, and bring tangible outcomes.
- **Proactive Responsibility:** You take ownership end-to-end, follow through on challenges, and deliver high-quality results without needing constant direction.
- **Team-First Energy:** You collaborate with enthusiasm, elevate those around you, and contribute to a culture of excellence and momentum.

What awaits you

- You'll collaborate with top-tier AI/ML engineers and domain experts to design robust retrieval, data-processing, and evaluation systems that take us from MVP to production-grade excellence.
- You'll map how human experts solve complex real-world tasks — and engineer LLM-based approaches that accomplish the same with reliability and accuracy.
- You'll own the technical stack end-to-end: data quality, data structures, ingestion, databases, evaluation frameworks, models, pipelines, experimentation, scalability, and production readiness.
- You'll be the technical backbone of the team — reviewing implementations, guiding engineering decisions, sharing knowledge, and driving high standards.

Can't identify with this role? No problem, convince us of your skills and personality, and get in touch.
